DEPARTMENT OF GENETICS
Professor Joshua Lederberg

Jan. 21, 1969

Dear Mr. Huntington--

Your point is well taken.

Sex drive in man seems to be much more cerebralized and less influenced by hormones than is true of other animals. However, there is a growing body of research on sex physiology and psychology directed at just such questions. Professor J. Money at Johns Hopkins Medical School is one of the country's outstanding experts on these matters.

You might find it of interest to subscribe to the journal "Medical Aspects of Human Sexuality."

Sincerely,

Joshua Lederberg
